NEW ON THE MARKET!

A real Infrared concept

- Easy to use
- The grill gives you a real grill/barbecue feeling and a perfect result
- No pollution - no use of gas or charcoal or other fossil combustibles
- Allowed in residential complexes - on balconies, terraces, in winter gardens and villas.
- Allowed when the authorities have prohibited grilling with gas or charcoal in extremely dry weather.
- Approved for indoor use
- High capacity
- Energy saving and patented control system for 2 individual grill zones

According to a market research, 96% think that the grill is easy to use and gives excellent grill/barbecue results, and 92% say it is at least as good or even better than gas and charcoal grills!
